- Our Chief Consultant is an experienced Business Communication Consultant and Design Engineer, a professional in the Business Solutions field.
- He has an outstanding industry reputation and has made substantial contributions at each company with which he has been associated.
- He strives to make all his customers happy. Whether it's a call center solution, network solution, digital voice recorder, CRM solution, VOIP solution or other communication need we have a Business Consultant for you!

#### Testimonial

- His knowledge and experience have been invaluable, as we have moved from one communications system to another. His skill level and focus on our needs allowed me to be fully confident that any project he was involved with would be a success. I highly recommend Gary for you communication needs!
- Gary's knowledge and ability made him a solid and dependable resource in his support of the system, and his work ethic consistently communicated his commitment to the clients' satisfaction.

A Business Communications & Business Solutions Consulting Company, devoted to the client and their needs!

Have you already started the process of looking for a new system or upgrade ?

Do you have a proposal on your desk or maybe several ?

Have they been there a long time ?

Not sure which is the best value ?

Are you moving into a new office space, adding employees or new product line ?

We at GL Voice Solutions & Consulting can help clear the air from an objective approach, evaluate the proposals and negotiate the best possible deal.

No Obligation Quote

Call center management solutions, reports, voice recording, voice mail systems, PBX,

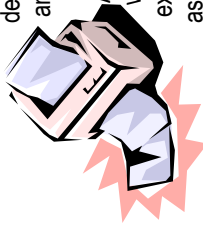

digital phone systems, application platforms, IVR, Call accounting packages, networking, Maintenance contracts, conference bridge units,

paging systems, **Solutions & Consulting at it's best!** Corp wireless, **Visit our Web site**

A whole host of other data and communications products.

We have the expertise to define business solutions, evaluate your current functionality, recommend communication products, advise on the impact of future trends, develop short- and long-term phased plans, analyze costs vs. benefits, develop vendor selection criteria, and put together RFP's.

As a vendor-neutral consulting firm, we provide independent advice and expertise to help you design and assess your current communications infrastructure.

**Paper fax why not go with a fax server save paper cost and file space!**

We work with you and your office staff, bringing new ideas on ways you can improve your business communications and customers experience!

Save money on carrier services Dial tone ,internet access, data networks, PRI T-1,DSL,ISDN and Voice over IP. Services are provided by quality companies, so everyone can sleep at night!

There is an old saying and it goes like this "You get what you pay for". This holds true in a lot of things, but in the telecommunication world it holds true till the end.

We here at GL Voice Solutions & Consulting believe in bringing value to your organization not the cheapest rate or cheapest product.

Here are some of the communication products we work with Inter\_Tel, Avaya, NEC, Mitel, Toshiba, Panasonic, Oaisys, Taske, Captaris

Cost Saving Ideas : Do you know you can save 14-18% on the average business call? Most business calls are from 2.6-3.6 minutes and if you reduce the call by 30 sec.. This is the effect!

That hiring a Communication Consultant to work for you ,will reduce over all cost of ownership when buying a new or replacement system ! When a RFP comes from an independent consultant the vendors will discount pricing in the range of 15-28 % just to get the business!

How about installing a Call Accounting Package ?

Your employees will bring e-mail , faxes and voice mail into Outlook quicker and think twice about how many personal calls they make. Pull call records today don't wait until there is a problem.

IT Managers say they never hear from reps after sales .Due to them not making quota, job changes within the company or a host of other reasons. This leaves them feeling frustrated and angry, no one to help them thru the next phase or even return calls.

Call or E-mail GL Voice Solutions & Consulting we see the project thru to the end!
